EDUCATION

UNIVERSITY OF CALIFORNIA, SANTA CRUZ

Santa Cruz, CA

Bachelor of Science in Computer Science

Sept. 2022 - Jun. 2026

Cumulative GPA: 3.4

Coursework: Data Structures & Algorithms, Software Engineering, Artificial Intelligence, Full Stack Web Development, Database Systems, Computer Systems Design

WORK EXPERIENCE

UC Santa Cruz Crown College

Santa Cruz, CA

Web Developer & Project Lead | **JavaScript, HTML5/CSS**

Aug. 2025 - Current

- Accelerated historical data retrieval times by **60%** for student researchers and staff by engineering a custom digital archiving application that indexed and structured **1,000+** uncategorized records
- Engineered and maintained **75+** responsive web pages while modernizing site architecture and improving maintainability across Crown's web platform, supporting **2,000+** students and **16,000+** alumni
- Enhanced UI consistency and accessibility compliance across the platform by implementing reusable, component-based architecture that cut down redundant design elements

Mindbody, Inc.

San Luis Obispo, CA

Software Engineer Intern | **C#, .NET Core**

May 2022 - Nov. 2022

- Scaled backend infrastructure for **40,000+** businesses by leveraging **C# and .NET Core** to engineer **15+** high-throughput RESTful API endpoints
- Achieved **90%** test coverage across critical backend services by designing and executing comprehensive unit and integration tests, significantly reducing regression risks
- Co-led a cross-functional initiative to architect and pitch a personalized, guided wellness plan product to company executives, shifting user engagement from transactional class bookings to holistic wellness paths

PROJECTS

Conversational Fact-Checking - [Verity](#) | **Next.js, React, Google GenAI SDK**

May 2025 - Jun. 2025

- Built a real-time conversation tracking system for automated fact-checking by architecting a dynamic data streaming platform built on **Next.js** and **Google GenAI SDK**
- Designed and implemented a retrieval-augmented fact-checking pipeline that queries live Wikipedia data, generates semantic context for user claims, and surfaces cited evidence in real time
- Reduced vector processing latency by **25%** by configuring a recursive text-chunking algorithm with 500-character boundaries to maximize context retrieval relevance

Resume Analysis - [SpeedFill](#) | **Next.js, React, Material UI, Supabase**

Jan. 2025 - Jun. 2025

- Automated the generation of tailored cover letters by developing a full-stack application that seamlessly parses target job descriptions and matches them against user resumes
- Processed **2,500+** resume-job description comparisons for **150+** beta testers by engineering a reliable web scraping pipeline using **Axios** and **Cheerio** for structured data extraction
- Implemented secure **Google OAuth** authentication and **PostgreSQL**-backed persistence using **Supabase**

Acne Classification - [DermaScan](#) (UCSC ACMHacks) | **Python, Flask, Keras, TensorFlow**

Oct. 2024 - Dec. 2024

- Awarded 1st Place at UCSC ACMHacks for developing a computer vision app using real-time facial scanning to identify various types of acne
- Achieved **~80%** classification accuracy across multiple categories by training deep learning models on a dataset of size **1,800** using **TensorFlow** and **Keras**
- Enabled real-time visualization by deploying a responsive web interface with **Flask, Bootstrap 5**, and **Vercel**

TECHNICAL SKILLS

Languages: C#, Python, JavaScript, TypeScript, HTML/CSS, SQL

Frameworks: .NET Core, React, Next.js, Flask, Node.js

Cloud / Databases: AWS (EC2, Lambda, S3), Supabase, PostgreSQL

Developer Tools: Git, Unix/Linux, Jira, Docker, Postman, Vercel
